Work Experience

Software Development - Focus Solutions LLC

December 2022 – Current

- Contributed to the development of user-facing features and backend logic, to ensure seamless integration and functionality.
- Integrated RESTful APIs to connect Prisma with Liquid templates, enabling dynamic rendering of user-specific wish list data from the database.
- Deployed scalable simplified e-commerce RESTful web applications to increase client business and growth.
- Performed rigorous testing and debugging to identify and resolve critical issues, ensuring robust and reliable application functionality.
- Collaborated with team members using Git for version control, streamlining development workflows and maintaining code quality.

Current Projects

Wishify Wish List App

- Stack: *React / JavaScript / Liquid / Prisma*
- Designed a front-end user interface with Liquid and React.
- Implemented a feature to allow users to add products to a wish list.
- Built a REST API with Prisma Client to interact with the Prisma database.
- Deployment of front-end user interface using Shopify.
- Deployment of a back-end server using Heroku to handle HTTP requests to the API.

GoodSleep

- Stack: *React / JavaScript / Express / Node / Stripe*
- Designed a front-end user interface with Node and React.
- Implemented features to allow users to add or subtract a product to checkout.
- Built a REST API with Express to process payments through Stripe.
- Deployment of front-end user interface using Netlify.
- Deployment of a back-end server using Heroku to handle HTTP requests to the Stripe API.

Landing Page

- Stack: *JavaScript / Node / Mail Chimp*
- Designed and implemented a new server-side user interface for a landing page with JavaScript.
- Integrated a REST API to submit user emails to a Mail Chimp CRM database
- Deployed front-end application using Hostinger.
